Unified. Simplified.

# Communications Today

*Environment: Chaotic, Cost-conscious, fragmented, and demanding*

## Communication Overload

How can I prioritize and react to the sheer volume of communications and be more productive?

## Global/Distributed Customers, Partners and Teams

How can I get a global organization to act in concert across boundaries?

## High Cost of Communications

How can I leverage existing enterprise infrastructure and the Internet to lower communications costs?

## Disparate, Complex Networks

How can I integrate my communications and PC networking infrastructures?

# Unified Communications

*Increased productivity through communications convergence*

**Streamline Communications for End-Users**

**Increase Operational Efficiency**

**Provide Built-in Protection**

**Build a Future-Ready Foundation on Software**
